Application: Project Manager — BI, Gameloft Bucharest

Dear Gameloft Hiring team,

I'm applying for the open position as Project Manager — BI. My work has always been about turning complex operations into shippable, measurable products — owning scope, requirements, functional flows and delivery end to end across mobile gaming, ad-tech and fintech platforms at scale, with the reporting and KPI dashboards leadership actually plans against.

Please find my application here: <https://www.pedrohiginioportfolio.xyz/>

I'd welcome the chance to discuss how I can help Gameloft deliver this transversal BI initiative on time, on scope and aligned across teams.

Kind regards,

Pedro
